PROFILE

Motivated IT undergraduate and website developer with hands-on full-stack experience, currently working as an IT Consultant & Tester in financial services. Builds fast, responsive, easy-to-use websites and applications. Driven by curiosity, strong analytical thinking and a passion for creating impactful digital solutions.

EXPERIENCE

IT Consultant & Tester (Intern) — ONGOING

Sharp Financial Services

- Testing software to find defects and confirm it works as intended
- Advising on IT solutions within a financial services environment

Web Development Intern — June 2026

CodSoft

- Developing and enhancing web features on real-world industry projects
- Gaining practical exposure to professional workflows and team collaboration

WEBSITE DEVELOPMENT SERVICES

Business websites, landing pages, portfolio sites and mobile-first design: fast, responsive and easy to use. See sakshishahtech.github.io

PROJECTS

Blood-Link: Real-Time Donor Logistics Platform

PHP | SQLite | JavaScript | HTML5 | CSS3

- Built a location-aware platform bridging urgent blood requests with real-time donor availability
- Implemented live status updates, a networked contact system and a fully responsive UI

UTS Replica & Tally Core

Python (Tkinter) | PHP | SQL

- Engineered a Universal Ticketing System with an end-to-end ticket-generation engine
- Developed a partial Tally Accounting clone, translating commerce workflows into GUI logic
